

Send Questionnaires & Make Cyber Risk Decisions with Confidence

Get a 360° View. Into Any Organization.

Validate questionnaire responses with SecurityScorecard Ratings in Atlas. Atlas' Smart Mapping Engine uses machine learning that helps you trust but verify your vendors' responses. See an organization's overall grade and map individual answers to specific issue-level ratings. With 1+ million companies rated, Atlas gives you the power to confidently make cyber risk decisions.

"Atlas has proven to be very, very useful in helping our organization move away from sending Word documents, relying on email, and a lot of miscommunication that you get with the old questionnaire processes."

- Kenneth Ord, Head of Security IT,
Modulr Finance

The current questionnaire exchange process falls short. Sending questionnaires through email is time-intensive. Tracking responses in spreadsheets is painful. Validating responses is difficult.

Atlas is the trusted questionnaire evidence and exchange platform built for modern sender management. Never send another spreadsheet or individual email again. Atlas streamlines sending cybersecurity questionnaires, making the process simpler, faster, and more secure with responses automatically mapped to SecurityScorecard Ratings.

Maintain Compliance. Minimize Risk.

Staying compliant is easy with Atlas' secure Evidence Locker. Maintain an immutable historical record of all interactions, questions, and answers, keeping you audit ready.

Initiate a Questionnaire in Seconds.

Choose from over 15 industry-standard questionnaires - such as ISO, SIG, and NIST - or upload your own questionnaires to assess vendors. White label your Atlas instance to match the look and feel of your brand for consistency across your digital assets. Schedule future questionnaires to operationalize vendor assessments.

Know the Status of Every Questionnaire.

Set deadlines and track status of outgoing questionnaires in one dashboard, giving you a single source of truth. Switch between list or kanban views, leverage tags for better organization, sort and filter by due dates, and see the turnaround time of all of your questionnaires. Stop sending follow-up emails with Atlas' automatic platform reminders.

Complete the Questionnaire Cycle 30% Faster.

Review answers in minutes with transparency at every step. Atlas' intuitive dashboard keeps you in control with the ability to mark questions as pending, flagged, or done. Add comments in Atlas to streamline collaboration with stakeholders. Gain on average, **30% time efficiency** during questionnaire review cycles, allowing your team to focus on higher-value activities.

Respond to Questionnaires in a Streamlined Way

Automatically Fill Out Responses.

Atlas' Smart Mapping Engine leverages machine learning to automatically map responses from previous questionnaires to new ones, eliminating the need for you to manually respond every time. Using advanced semantic and syntactic analysis, Atlas is able to recognize and answer the same question, even if it is asked differently.

Responding to cybersecurity questionnaires takes hours, involves tedious copying and pasting, and is difficult to collaborate on across multiple stakeholders. Reporting on relevant risks in a consistent way is challenging across different types of questionnaires. Atlas empowers questionnaire receivers to reply efficiently, accurately, and consistently.

Atlas' unique Smart Mapping Engine standardizes a variety of inputs so answers to security questions can be auto-filled, helping you respond to questionnaires up to **7 times faster**.

Reply Accurately and Consistently. Every time.

Maintain consistent answers across all questionnaires to ensure that you are giving the right level of information to the right partners. Reduce manual errors and careless mistakes with the Smart Mapping Engine.

Access Everything On-Demand in One Secure Place.

Stay in control of every questionnaire you receive. Upload any previously filled out questionnaires to your secure Answer & Evidence Repository, making it your single source of truth. With a centralized content management dashboard, you won't have to dig through messy folders.

About SecurityScorecard

SecurityScorecard helps security professionals work collaboratively to solve mission-critical, cybersecurity issues in a transparent way. The SecurityScorecard platform provides continuous, non-intrusive cyber risk monitoring of any organization and its ecosystem.

Easily Collaborate with Your Stakeholders.

Eliminate email back and forths and time wasted waiting for updates in order to finish a questionnaire. Assign teammates to specific questions, giving them secure access to complete questionnaires up to 70% faster. Insert all comments in Atlas, giving you clarity without email chains.
